Layland Beck	Redcar & Cleveland	G1		Meadow grassland management, tree planting on amenity grassed areas and beck management taken place over the last year.	2014	Management evidence	Jo Fearey, Redcar & Cleveland Council	Yes

Lingdale Common	Redcar & Cleveland	G1		A shale heap straddled this area. Since that has been removed, it has been transformed into recreational meadows where wild orchids grow and used recreationally for horse riding and dog walking. A regular maintenance programme now exists with Redcar & Cleveland Council and the summer hay is harvested by 2 local farmers who are assisted by the Lingdale Lift Off Group, with the removal of the ragwort which is unsuitable for feeding. The grassed area next to the stone wall along the High Street was not cut completely in 2013. That brought forth a few clumps of wild cowslips which, it is hoped, will spread. When the snow receded in the spring of 2013 it left a small wetland area. In June the wildlife meadow is covered with great swathes of wild orchids in many places.	2016	Management evidence	Redcar & Cleveland BC	Yes
Little Dale Grassland	Redcar & Cleveland	G1		Scrub management/fencing	2014	TVNP Restoring Lost Meadows Project	Tees Valley Wildlife Trust	Yes
